Application for the Position of Assistant to Medical Science Officer

Dear Members of the RSU ISA Board,

My name is **Mariana Lobato de Oliveira Real Pereira**, and I am a third-semester medical student at RSU. I am writing to express my strong interest in the position of Assistant to Medical Science Officer within the RSU International Student Association. With a background in Biomedical Engineering and a deep enthusiasm for research and student engagement, I am eager to contribute to the growth and promotion of scientific initiatives among RSU students.

Before joining RSU, I completed my **Bachelor's in Biomedical Engineering**, where I actively participated in student organisations. I had the privilege of serving as **Vice Chair** and later as **Coordinator of the Department of External Relations** for the *IEEE ISEL Student Branch*. In these roles, I coordinated collaborations between universities and companies, organised academic events and webinars, and ensured effective communication between members and external partners. I also managed scheduling and activities — and discovered that clear communication (and occasionally, a good cup of coffee) can solve almost any coordination challenge.

These experiences taught me not only how to plan and lead, but also how to connect people through shared goals. They strengthened my appreciation for structured yet creative teamwork — a quality I believe is essential for supporting the Medical Science Office's initiatives.

As Rosalind Franklin once said, "*Science and everyday life cannot and should not be separated.*" This idea reflects the philosophy that drives my passion for medical science — that our studies and research are not abstract concepts, but deeply linked to improving real human lives. At RSU, I aim to help expand student research opportunities, strengthen collaboration with RSU laboratories, and organise events that make research more accessible and inspiring. After all, science should feel like exploration — not like trying to read an ECG upside down.

I would be honoured to bring my commitment, creativity, and positive energy to this position, supporting the ISA team in cultivating a thriving scientific community at RSU.

Thank you for considering my application.

With best regards,

Mariana Real Pereira

3rd Semester, Faculty of Medicine

Riga Stradiņš University
