

Dear ISA Academic Affairs Committee,

I am eager to join the Academic Affairs team as Head or Assistant Head of Academic Affairs at the International Students' Association, where I hope to actively support and improve the academic experience at RSU. As a medical student at Riga Stradins University, I am highly motivated to contribute to the student community and to strengthen both academic and social life on campus.

Through my experiences in different fields, I have developed strong skills in collaboration, communication, and responsibility. I have supported individuals with special needs, worked in team-based environments with a focus on quality and efficiency, and taken part in creative projects such as children's theater, where teamwork and clear communication were essential. These experiences have shaped me into a reliable, positive, and adaptable person who thrives in diverse groups.

I believe that my enthusiasm, commitment, and ability to work both independently and in teams would make me a valuable member of the Academic Affairs team. I am eager to bring my energy, creativity, and dedication to support ISA's mission and to help create a supportive academic environment for all students.

Thank you for considering my application. I look forward to the opportunity to contribute and to take an active role within the ISA Academic Affairs team.

Sincerely,
Simoun Chamoun
